

\$100m ideas

- Flip universities to OA
- Build an open knowledge graph
- Observatory of social and civic media
- Open mapping infrastructure, past and present
- Software preservation, preserving living websites
- Full digitization of libraries with universal lending
 - Global memory lab, story corps
 - Digitization of every student's portfolio
- Nonconsumptive computation of all the things!
- Canonical links - content addressing/hashing
 - Keep data alive indefinitely

underlying structures

Global memory lab, story corps &
Digitization of every student's portfolio
require open, public Flickr, SoundCloud, etc.

Keep data alive indefinitely requires
Software preservation, preserving living websites

underlying questions

Full digitization of libraries &
Observatory of social and civic media
(and possibly open mapping)

lead to

Non-consumptive computation of all the things!
